SUMMARY

Full-stack developer and B.S. Computer Science / Cybersecurity Engineering student (Dean's List) with production experience across client websites, e-commerce platforms, APIs, and edge infrastructure. Ships fixed-scope work on clear timelines with direct client communication — live deployments, not mockups.

TECHNICAL SKILLS

Core Stack	JavaScript, TypeScript, React, Svelte / SvelteKit, Astro, Vue, Vite, Solid, Node.js, Next.js, Tailwind CSS
Backend & Data	REST APIs, Stripe checkout, PostgreSQL, Redis, Python, Java (Spring Boot)
Cloud & DevOps	Cloudflare (Pages, Workers, D1, R2, Queues), Docker, GitHub Actions CI/CD, DNS
Security	Burp Suite, Nmap, OWASP Top 10, vulnerability research, authorized bug bounty, Solidity auditing
Systems	Linux (Kali, WSL), Windows 10/11, macOS, hardware build/repair, Bash, HTML/CSS

EXPERIENCE

Freelance Web Developer & Webmaster — myhairloss.com 2026 – Present

- Design, build, and maintain a production Next.js healthcare marketing site (Stripe shop, booking and contact APIs, admin panel, blog with RSS) on Cloudflare Pages with custom domain.
- Manage domain, DNS, hosting, deployment pipeline, SEO content, and client communication; rescued a non-functional client site into a working production site same-day.

E-commerce Infrastructure — United Distribution, Florissant, MO 2026

- Architected KananOS/kanan-e, a multi-tenant B2B/B2C wholesale e-commerce platform: product catalogs (~100+ SKU categories), payment flow, and deployment pipeline.
- Direct owner communication with reliable delivery across storefronts, checkout, and catalog management.

Security Research & Engineering Projects 2026

- Authorized vulnerability research (Dropbox, Azure DevOps, and others) from a Kali Linux recon lab; Solidity smart-contract auditing toolkit (Viper-Web3) with a live edge-hosted analyzer.
- Built AgentOS (multi-module Spring Boot 3 / Java 21, Gradle, Docker) and full-stack SaaS with Postgres/pgvector, Redis, and Clerk auth.

EDUCATION

Webster University — B.S. Computer Science, Cybersecurity Engineering Concentration Incoming, Spring 2027
Transferring from CTU; expected graduation 2029.

Colorado Technical University — B.S. Computer Science / Cybersecurity Engineering Enrolled September 2025
Dean's List. Coursework: Fundamentals of Networking, Fundamentals of Programming, Introduction to Programming (Python), Introduction to Computer Security, Information Security Fundamentals.

ADDITIONAL

- Florissant, MO (St. Louis metro); flexible availability including mornings and weekends.
- Comfortable with clients, staff, and end users; managed multiple client projects while maintaining Dean's List status.
