

Jacob Michael Viefhaus

Full-Stack Developer · Cybersecurity Engineering Student — Curriculum Vitae

Florissant, MO | (636) 448-3574 | geekhaus314@proton.me
github.com/geekhaus314 | gitlab.com/geekhaus314 | pwn4g3.pages.dev

PROFILE

Full-stack developer operating as pwn4g3, final-year B.S. Computer Science / Cybersecurity Engineering student (3.9 GPA, Dean's List every quarter). Practice spans production client websites, multi-tenant e-commerce, SaaS backends, edge infrastructure (Cloudflare Workers, Pages, D1, R2, Queues), and offensive-security tooling. Seeking part-time or entry-level IT, web development, or security roles, alongside freelance client engagements.

EDUCATION

Colorado Technical University — B.S. Computer Science / Cybersecurity Engineering Expected 2027
3.9 GPA — Dean's List every quarter; 50 credits earned with two semesters remaining. Coursework: network security, operating systems, programming, web technologies, databases, information assurance, artificial intelligence, college mathematics (algebra), communication, writing, ethics, and sociology.

PROFESSIONAL EXPERIENCE

Freelance Web Developer & Webmaster — Brian Ivie Hair (myhairloss.com) 2026 – Present

- Own a production Next.js healthcare marketing site end to end: Stripe shop, booking and contact APIs, admin panel, MDX blog with RSS, Cloudflare Pages deployment with custom domains.
- Client communication, SEO content, domain/DNS management, and continuous maintenance; recovered a non-functional predecessor site into production same-day.

E-commerce Infrastructure — United Distribution (Florissant, MO) 2026

- Designed and built KananOS/kanan-e, multi-tenant wholesale e-commerce: branded storefronts, product catalogs (~100+ SKU categories), checkout flow, and CI/CD deployment.
- Worked directly with the business owner from scoping through delivery and iteration.

Wildlife Photography Portfolio — Angie Viefhaus (client) 2026

- React + TypeScript + Tailwind portfolio (hero, manifesto, gallery, lightbox) with serif-forward editorial design, deployed to Cloudflare Pages.

SELECTED PROJECTS

Viper-Web3 + edge analyzer

Solidity, Python, Cloudflare Workers — github.com/geekhaus314/Viper-Web3

Smart-contract auditing toolkit plus a live edge-hosted analyzer (heuristic triage + executable audit plans for solc/hevm/slither/mythril).

AgentOS — Vertical AI Revenue Infrastructure

Java 21, Spring Boot 3, Gradle, Docker, AI agents

Multi-tenant AI revenue workflow platform with industry vertical modules, white-label reseller deployment, and audited tool authorization.

ProofShelf — Full-Stack SaaS

Next.js, PostgreSQL/pgvector, Redis, Clerk

Semantic-search SaaS with Dockerized API + worker services in a pnpm monorepo.

NightAnvil — Freelancer Business Toolkit

Python, Flask, Stripe, PostgreSQL

AI gig generation, PDF invoices with payment tracking, Stripe checkout + webhooks, Fiverr sync.

Obsidian Platform / bb-suite — Bug Bounty Tooling

Go, Python, ASM/recon

Attack-surface management platform and modular CLI reconnaissance toolkit for authorized bounty programs.

pwn4g3 portfolio infrastructure

SvelteKit, TypeScript, Cloudflare Pages/Workers/D1/R2/Queues

This portfolio: multi-page frontend plus a gateway-routed worker fleet (booking pipeline with Turnstile + queues, telemetry, notifications, media CDN).

TECHNICAL SKILLS

Core Stack	JavaScript, TypeScript, React, Svelte / SvelteKit, Astro, Vue, Vite, Solid, Node.js, Next.js, Tailwind CSS, responsive/mobile-first design
Backend & Data	Node.js, REST APIs, PostgreSQL/pgvector, Redis, Clerk auth, Stripe, Python, Flask, Java (Spring Boot 3)
Cloud & DevOps	Cloudflare (Pages, Workers, D1, R2, Queues), Vercel, Docker, GitHub Actions, DNS, SEO/analytics configuration
Security	Burp Suite, Nmap, nuclei, OWASP Top 10, Kali Linux recon lab, authorized bug bounty (Dropbox, Azure DevOps), Solidity auditing, firewall hardening
Systems & Other	Linux (Kali, WSL), Windows 10/11, macOS, hardware build/repair, Bash, Android/ADB, Go, Rust, Ruby (working knowledge)

SERVICE OFFERING (FREELANCE)

- **Launch (\$1,200, 1–2 weeks):** up to 5 custom pages, booking/contact + email, SEO foundations, analytics, security headers.
- **Build (\$2,800, 3–5 weeks):** custom web apps (auth, admin, payments), database + CI/CD + custom domain, end-to-end service flows.
- **Scale (\$5,000+, ongoing):** multi-tenant platforms, AI/automation systems, security review + hardening, retainer.

ADDITIONAL

- Based in Florissant, MO (St. Louis metro); remote-friendly with flexible availability including mornings and weekends.
- Direct client communication throughout — scoping, live preview builds, handover with full code ownership transfer.
